P0. Practice Problem

Problem Description.

Before you start participating in the Hackathon let's use a simple problem for you to become

familiar with the way you must code your programs for submission.

Your task is to...

Given a file f containing n integer numbers (one number per line), read the numbers a, b

and c from the first three lines of f and print their sum; if f contains less than three numbers, print

ERROR).

Sample Input: Output to be printed:

5   14

3

6

4

8

9

2

Sample Input: Output to be printed:

3   ERROR
